N.A.S.A. member Everglades Steel has implemented Bayern's STEEL PLUS software to improve efficiency and allow continued growth.

Phoenix, AZ – Bayern Software, a leading developer of enterprise software solutions for metal service centers and distributors, has announced that Everglades Steel, Metallic Products, and Medley Steel of Miami, Florida, have implemented STEEL PLUS as their complete business software system. STEEL PLUS will provide inventory control, sales, purchasing, accounting functions, and more.

Orlando Garcia, President of Everglades Steel said "We chose STEEL PLUS because they offered a very comprehensive software at a reasonable price."

Everglades Steel is a proud member of the North American Steel Alliance.

About Bayern Software

Headquartered in Phoenix, Arizona, Bayern Software has been a market leader in the development of specialty software for metal service centers and distributors for 25 years. Bayern's software products are actively used by over 325 North American service centers and distributors. Bayern provides accounting, inventory control, sales, purchasing, document imaging, labor tracking, and barcoding software solutions to the metals industry.

Using a unique approach, Bayern has succeeded in bringing to market robust applications that work equally well for flat rolled products, plate, general line, structural products, tool steel, and specialty service centers. For more information, please visit www.bayernsoftware.com or call Bayern's Headquarters at (623) 298-5228.

About Everglades Steel

Everglades Steel Corporation has been providing a full line of quality steel products for over 25 years. Throughout this time, they have chosen to dedicate their efforts and resources to fulfilling the needs of many industries such as Sugar Mills, Mining, Ship Builders, Power Plants, Bridge Construction, Metal Fabrication, Cement Companies, and many more domestically and abroad. Their primary goal is to provide customers with the products and services they need in a timely manner, at fair prices. As a member of the North American Steel Alliance, we have access to many steel mills and through their combined purchasing power they can obtain competitive pricing in order to provide their goods and services at prices their customers need to profitably run their business.
