N.A.S.A. member Sol's Pipe & Steel has selected Bayern's STEEL PLUS software to improve efficiency and allow continued growth.

Phoenix, AZ – Bayern Software, a leading developer of enterprise software solutions for metal service centers and distributors, has announced that Sol's Pipe & Steel of Monroe, Louisiana, has selected STEEL PLUS as their complete business system. STEEL PLUS will provide inventory control, sales, purchasing, accounting functions, and more.

Sol's Pipe & Steel is a proud member of the North American Steel Alliance and the National Association of Steel Pipe Distributors. Sol's Pipe & Steel selected STEEL PLUS for its ease-of-use and ability to handle the wide range of products and services offered by their business.

About Bayern Software

Headquartered in Phoenix, Arizona, Bayern Software is a market leader in the development of specialty software for metal service centers and distributors. Bayern's software products are actively used by approximately 300 North American service centers and distributors. Bayern provides accounting, inventory control, sales, purchasing, document imaging, labor tracking, and barcoding software solutions to the metals industry.

Using a unique approach, Bayern has succeeded in bringing to market robust applications that work equally well for flat rolled products, plate, general line, structural products, tool steel, and specialty service centers. For more information, please visit www.bayernsoftware.com or call Bayern's Headquarters at (623) 298-5228.

About Sol's Pipe & Steel

Sol's Pipe & Steel is a family-owned, full-line metals service center in Monroe, Louisiana, with an extensive inventory of materials and products and the manufacturing capability to provide fast turnaround on a wide variety of products, including rolled and welded, high-grade structural steel pipe in sizes up to 20 feet in length with up to 2-inch-thick walls and 15-foot diameters. The Titan Division with its new, giant, custom-built European rolling machine has the capability to process our super-sized Titan Series pipe that's used nationally and internationally for a wide variety of demanding structural steel projects. The New Steel & Pipe Division services primarily the Ark-La-Tex and Ark-La-Miss regions with an exceptional array of products. And the Used Pipe Division services markets nationally with a wide variety of used pipe products. For more information, visit www.solspipeandsteel.com.
