

Bayern Barcoding

Get Control Of Your Inventory And Reduce Physical Inventory Count Times

OVERVIEW

Bayern Barcoding allows users to gain more control over your inventory through the use of bar coded stock tag labels, shipping labels, hand-held scanners, and inventory control software routines built specifically for STEEL PLUS customers.

Bayern Software has partnered with Symbol Technologies and Zebra Technologies to bring the latest in bar code technologies to STEEL PLUS. These programs will greatly enhance your company's productivity. The following functions are available:

- Physical Inventory
- Staging of Tagged Inventory
- Location Verification/Transfers
- View Tag Information
- Quality Control/Observation Codes
- Update Sales Order Status
- Bundle Tracking

Bayern Barcoding utilizes Symbol mobile scanners and a variety of bar code printers including those from Zebra and ThermaBar. Using these state-of-the-art technologies, your office and warehouse personnel will have a better handle on what inventory you have and where to find it.

With Bayern Barcoding, you can be assured of having the right information at the right time!

CUSTOMIZED TO FIT YOUR NEEDS

Bayern's development staff can modify the Bayern Barcoding programs and even design custom applications and bar code labels to meet your specific needs.

WIRELESS REAL TIME DATA

Bayern Barcoding utilizes WiFi wireless network environments. This will enable your staff to get real-time information in the palm of their hands!

REAL BENEFITS

The benefits of Bayern Barcoding show up where it matters most...the bottom line! Using barcoding technologies from Bayern Software can help you achieve the following benefits:

- Gain more control of your inventory
- Locate inventory faster
- Reduce physical inventory times
- Reduce shipping errors
- Reduce human error in the warehouse
- Improve information sharing
