## AUTOMATIC DELIVERY

Bayern Fax can also be used to automatically fax documents to your customers. Automatic delivery faxing allows you to create and send large quantities of documents at a specified time. For example, many STEEL PLUS users will select invoices or statements to be printed, and then choose to fax them to their customers in one large group fax. Automatic delivery faxes can be configured to be sent after hours so that you don't tie up your phone lines during regular business hours.

## EMAIL CONFIRMATION

Knowing that a fax was actually sent is critically important. That is why Bayern Fax can be configured to send an email a notice when a fax has been sent successfully or if a failure has occurred.
