

INTEGRATED WITH STEEL PLUS

Bayern Software also offers other powerful products for metal service centers. Our flagship product, **STEEL PLUS**, is now used by over 325 metal service centers across North America. **STEEL PLUS** is an integrated inventory control, sales, purchasing, and accounting system designed for metal service centers and distributors.

Here are just a few of the benefits of using **BAYERN IMAGING** with **STEEL PLUS**:

- Auto-delivery option allows MTRs to be automatically emailed, faxed, or printed
- Store customer delivery preferences (MTRs can be printed, emailed, or faxed directly to customers based on their preferences)
- Attach other documents (such as signed shippers, letters, and CAD drawings) to **STEEL PLUS** sales orders and invoices

ABOUT BAYERN SOFTWARE

Bayern Software has provided software to metal service centers and distributors for more than 25 years. Our integrated order entry, inventory control, and accounting systems are used on a daily basis by thousands of individuals across North America.

www.bayernsoftware.com

BAYERN IMAGING allows you to store and easily retrieve material test reports (MTRs) and other critical documents. It also allows users to easily retrieve these documents through powerful search functions. In addition, **BAYERN IMAGING** includes state-of-the-art delivery functions. This powerful addition to the Bayern Software lineup allows you to print, fax, and email test reports to your customers in a matter of seconds.

DOCUMENT CONTROL

Controlling MTRs and other documents can be a daunting task. Fortunately, the features available in **BAYERN IMAGING** help to reduce the amount of time and effort typically associated with these tasks. MTRs and other documents can be easily scanned one-by-one or in batches using reliable, high-speed scanners. In addition, you can easily attach documents that you have received via email or EDI. It's as easy as working with email attachments!

SEEK AND YOU SHALL FIND

We've worked hard to make it easy to find MTRs and deliver them to your customers. You decide what information is stored with your documents, and you decide how you want to search for them. You'll have the option to search for MTRs by:

- Heat #
- Tag #
- Mill Reference #
- Item ID
- Purchase Order #
- Vendor
- Other information (that you choose) stored in additional user-defined fields

BAYERN IMAGING will take all the hassle out of searching for your MTRs!

DELIVER WITH EASE

Delivering MTRs has never been easier. Once you use our powerful search engine to find your MTRs, you can print, email, or fax the MTRs right from your computer screen! We integrate directly with Microsoft Outlook to provide an easy and powerful way to email your MTRs and other documents. You can also electronically fax MTRs to your customers without printing hard copies or ever leaving your desk!

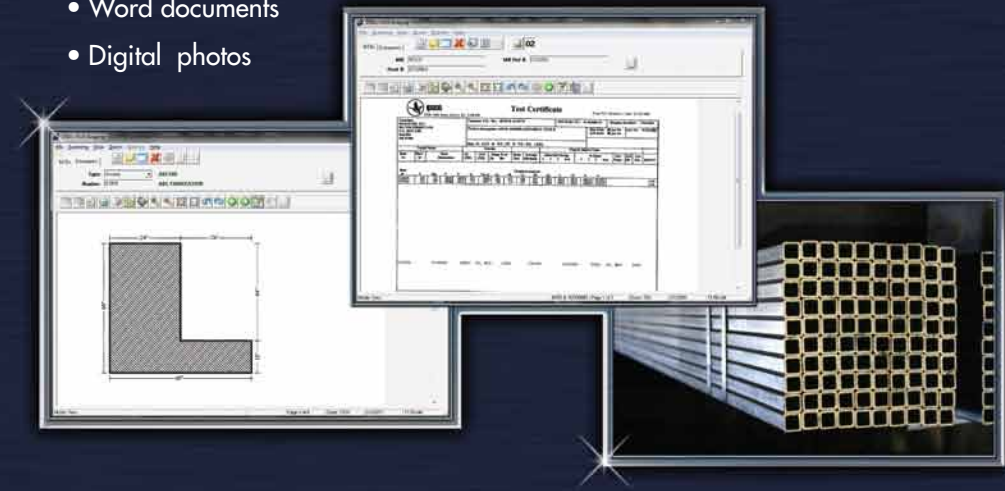

SECURITY

Our security options allow you to control who can add, edit, or delete images. Basic users only have rights to view and send MTRs.

OTHER DOCUMENTS AND FILES

BAYERN IMAGING also gives you the power to scan or attach other images and file types. You can store images by Invoice #, Packing List #, Purchase Order #, Sales Order #, and Tag #. Here are a few examples of the types of documents and images our customers are storing in **BAYERN IMAGING**:

- Signed shipping paperwork
- CAD drawings
- Word documents
- Digital photos

With **BAYERN IMAGING**, you'll have the power to keep track of all kinds of files, images, and drawings!

ANNOTATE

We include simple tools that allow you to annotate your stored images. Here are a few of the most common reasons to annotate an image:

- To clean up faxed MTRs
- To hide vendor information (i.e., if you purchased from a distributor or another service center)
- To stamp information such as PO #, Work Order #, and/or Job name onto the MTR for customer delivery

BAYERN IMAGING allows you to deliver an MTR right from the annotations screen. You'll also have the option to save your annotations or keep the original!
